Outpatient Services

ASAM Level II Intensive Outpatient Program

The Intensive Outpatient Rehabilitation Program is designed for those patients who have gone through our intake process and have been assessed as being dependent on alcohol and or drugs. The program has a variable length of stay, which is determined through the utilization of ASAM criteria to assess the severity of addiction.

Case Management Services for Intensive Outpatients

Case Management services are provided for all patients in the intensive outpatient program. These services include: assessing patient's needs, providing information, individual counseling, providing patients with referrals for other needed services, follow up with patients and referrals for coordination of services and evaluations, reporting to referral sources on patient's progress in treatment, advocating on the patients behalf within the social service system.

Aftercare Program

ASAM Level 1 Outpatient Counseling (OP) Abuse

This program is for clients with a diagnosis of chemical abuse and or dependence alcohol/drug abusers and meets the requirements for DUI referrals who have been classified as level 11, moderate, significant and level 111 dependent.

ASAM Level 1 Outpatient counseling (OP)

After successful completing the Intensive Outpatient Rehabilitation Program, patients may be referred to the Outpatient counseling. This is a continued counseling program.

DUI Evaluations

Aftercare Group - An aftercare care group of patients who have been diagnosed as being dependent on alcohol and or drugs and patients who have been diagnosed as having an abuse problem.

DUI Evaluations - Conducted as initial screening to obtain significant and relevant information from the offender about the nature and extent of use of alcohol/other drugs in order to identify the offenders risk to public safety for the court of venue or the office of the secretary of state.
